

AKHIL P SURESH

Software Engineer

Parappil House, Kuriachira PO, Thrissur 680006

Phone: +91 7012732186 | Email: akhilps119@gmail.com

Skills

- Programming Languages: Python, JavaScript, HTML, CSS, Kotlin
- Frameworks: Django, Flask, LangChain
- Machine Learning: PyTorch, TensorFlow, LLM, Generative AI
- Database Systems: PostgreSQL, MySQL, MongoDB
- Tools: Docker, Jupyter Notebook, Android, Selenium
- Version Control: Git
- Soft Skills: Collaboration, Problem-solving, Communication, Critical Thinking

Professional Experience

Gritstone Technologies LLP - Product Engineer (Python)

Kozhikode, Kerala, India | Oct 2023 - Oct 2024

- Engineered a medical chatbot that supports doctors by suggesting relevant questions, aiding in diagnoses, and generating comprehensive case sheets, all seamlessly integrated into EMR systems to boost efficiency.
- Developed a Selenium bot for scraping client website data and automated updates using RAG and Generative AI, significantly reducing manual data input.
- Created a real-time transcription solution with WebSockets, enabling keyword detection and entity recognition, streamlining healthcare documentation processes.
- Designed and implemented a deep learning security tool that prevents unauthorized web and USB interactions, proactively identifying potential threats.

Freelancer - Python Developer

Thrissur, Kerala, India | Dec 2022 - Oct 2023

- Automated web scraping and data entry through RPA bots using Selenium, slashing manual effort by up to 40%.
- Led AI and RPA training programs for over 300 students, mentoring them in real-world project development.
- Built scalable and efficient web applications leveraging Django and Flask, optimizing data processing pipelines and improving performance.

Brandon Industries - Python Developer

Thrissur, Kerala, India | Aug 2021 - Dec 2022

- Deployed Python-based RPA solutions for automating IoT data collection and reporting, enhancing data accuracy and timeliness.
- Developed predictive models with Generative AI to improve business decision-making and minimize human error by 15%.
- Integrated AI-driven automation for document processing, streamlining workflows and increasing business efficiency.

Inker Robotics - Junior Software Engineer (R&D)

Thrissur, Kerala, India | Sep 2019 - Apr 2021

- Automated repetitive processes within robotic systems using Python, improving overall operational speed and system reliability.
- Developed an AI-powered voice assistant for humanoid robots, enhancing user interaction and providing more intuitive communication.

Education

B.Tech in Computer Science

Thejus Engineering College | Thrissur, Kerala, India | Aug 2015 - Apr 2019

- Completed internships in software engineering.
